

How to Choose a Healthy Hydrangea at the Garden Centre

1. ✅ Check for strong, thick stems and a balanced shape.
2. 🌿 Ensure leaves are bright green, with no holes or yellowing.
3. 🌱 Look at the base—roots should not be bursting out the pot.
4. 📋 Read the label: check for hardiness, final size, and planting info.
5. ❌ Avoid wilted, black-spotted or insect-covered plants.
